## FRUITS & VEGETABLES PROCESSING EQUIPMENTS

Vegetable Slicing and Cutting machine products variable sized slides which are then conveyed to chopping section. By changing various cutter available, it can cut various kinds of vegetables and fruits into slices, cubes, diamond, strips, waves shapes.

### Technical Details:

| Model  | Capacity (kg/h) | Power  |
|--------|-----------------|--------|
| VSC-21 | 130-660         | 0.75KW |
| VSC-31 | 200-1000        | 1.5KW  |

### Vegetable Disc Grinding Machine

Vegetable Disc Grinding Machine can process various vegetables to be grind / chopped quickly and easily.

This machine adopts the principle of simultaneous motion which can make vegetables and the cutters moving together and therefore making the vegetable grind.

### Technical Details :

Capacity : 200-500kg/hr.  
Power : 1.5kw

### Vegetable Cubing Machine

Suitable for dicing and cubing of fruits and vegetables. It can make cubes cubes in sizes of 3x3 mm to 20x20mm with inter changeable moulds.

### Technical Details:

Capacity : 700-1000kg/hr.  
Power : 0.75kw

### Benefits of Vegetables & Fruits Processing Machines

- High Product Quality
- Reduced Labour Costs
- User Friendly
- Easy and Time Saving Cleaning
- Meets Hygiene / Sanitary Standards
- Gentle Product Processing
- Product gets free from stones, skin and leaves
- High Yield, less Wastage
- Economical Machines

### Fruits and Vegetable Washing Machine

Suitable for washing and peeling of root vegetables. The machine is equipped with rotating soft/hard brushes which properly clean and peels the vegetables under water spray. Different Models are also available as per production

Capacity required :-  
Specifications :  
Capacity : 200-400kg  
Power : 1.5kw

### Fruits and Vegetable Slitting Machine

Suitable for uniform slitting of root vegetables. The machine is equipped with conveyor and rotating blade set which makes the slitting uniform.

Specifications :  
Capacity : 400-600kg/hr.  
Power : 0.75kw

### Multi Functional Vegetable Cutting Machine

The vegetable cutting machine is a multi-function cutter for both fruits and root vegetables like potato, carrot, onions, cabbage, spinach, and other long strip material.

The cutting speed and cutting size is adjustable by the variable frequency Drive.

Specifications :  
Capacity : 300-1000kg/hr.  
Power : 3kw

### Vegetable Cutting Machine (Hand Push)

Vegetable Cutting Machine (hand Push) is more suitable for processing big hard vegetables into slices and shredding of uniform length. This machine uses rotating cutter cutting, process all kinds of vegetables into slices / flakes of uniform thickness and size. The machine has high efficiency, easy operation, low energy consumption and ideal equipment for the vegetable processing industry.

Specifications:

Capacity : 300-600kg/hr

Power : 0.75kw

### Multi Functional Vegetable Cutter (Table Top)

Multi Functional Vegetable Cutter (Table Top) is a ideal machine for cutting all kinds of fruit and vegetable, It can cut into slice, block, shred, diamond shape, curvilinear shape. By changing the knife of the machine, the desired shape can be made. The thickness can be adjusted freely and is easy to clean and operate.

Specifications:

Capacity : 60-120kg/hr

Power : 0.35kw

### Potato Peeling Machine

This potato peeler is designed to peel potatoes and other hard vegetables. The machine is widely used for restaurant, hotel, mess hall, and other vegetable processing units. The Potato Peeler is an ideal peeling equipment owing to high peeling rate, low breakage and automatic operation.

Specifications:

Capacity : 200-400kg/hr (Different Models)

Power : 0.75kw 1.5kw
